Power Button of Remote Controller

Toggle Key

Tripod Stand
## Instruction for use

① **Power Button:** Long press for 1 second to turn on, long press for 1 second to turn off.

② **Without pairing:** No connection for 10 minutes after power-on, the tripod will automatically sleep.

③ **Sleep Mode:** Automatically sleep after 30 minutes of no operation after connection.

④ **Disconnection:** The green light flashes once a second.

⑤ **Clear the pairing:** Long press the shutter and Record buttons until the red-light blinks and turns off.

⑥ **Shutter Button:** Long press to focus, release to end focusing and start taking photo.

⑦ **Recording:** Recording is performed after the recording button is released (for beingcompatible with CZ010---recording button and the power button).

⑧ **GoPro Connection:** When GoPro is connected, the record button(K4) is used as a switch button, and the Shutter button (K2) as the execution button.

## Indicator light description

① **Green Light:** After power-on there is no connection, and it flashes slowly; there is a connection, it is always on, and when it is fully charged, it is always on.

② **Red light:** when the battery is lower than 10%, it flashes slowly; when clear the pairing it flashes quickly; during charging it is always on. The red-light priority is higher than the green light, when the red light is activated, the green light is off.

## How to connect with a GoPro?

# 1、GoPro Bluetooth Connection

Take GoPro hero10 as an example:

① Long press the power button and switch button of the selfie stick,until the flash red light turn to the green.

② Power on the GoPro hero 10, pull down the selection box from the top, click "connect".

③ Click on "connect to new device". ④ Click on "GoPro App".

*Long press the power button and switch button at the same time.

*If the above operation fails to connect to the device, please clear the pairing of the selfie and follow the steps below, and then repeat the steps above again.

① Pull down the selection box from the top, click "connect".

② Click "reset the connection".

③ Click "reset".
